Dynabrade Electric Right Angle Polisher

Dynabrade's new Electric Right Angle Polisher brings quality and efficiency to all your polishing applications! Tool accepts 178 mm diameter wool and foam polishing bonnets (sold separately), for use on clearcoat, gelcoat, fiberglass, plastic and more.

Model 51615

800-1800 RPM

- Excellent for polishing applications in industries such as automotive, marine, plastic, fiberglass and more.
- Tool includes variable speed trigger, and electronic speed regulator (see photo).
- Accepts foam and wool buffs or polishing bonnets, 178 mm in diameter (sold separately).
- Electrical tool is double-insulated (Class II) for safety.
- Quick and easy change of replacement brushes, for reduced downtime.
- Tool spindle locks in place for efficient changing of pad or bonnet.
- Lightweight tool can be comfortably used in horizontal or vertical applications.
- Side handle attaches for left or right handed use.

Electronic Speed Regulator adjusts tool speed from 800 to 1800 RPM, and locks in constant speed while tool is in use.

90082 Polishing Bonnet

178 mm Diameter

- Natural Sheepskin Wool.
- Ideal for use with 51615 tool.
